Course Objectives / 授業の目的と概要	<p>(COURSE OVERVIEW)</p> <p>Phenomenology is a method in philosophy, founded by Edmund Husserl (1859-1938). Husserl himself intended to contribute to the epistemology of science but the phenomenology as a method has a wider potentiality which goes beyond his intention.</p> <p>In short, the phenomenology is a powerful tool to analyze the experience and the behavior of human beings. Otherwise than other empirical methods of research (for example, qualitative researches in sociology), it can grasp the meanings of the individual experience in its contingency.</p> <p>In my research in this domain of the applied phenomenology, I conducted my fieldworks first in a pediatric hospital to study the autism of children (more precisely, PDD) and actually I collaborate with nurses to analyze their praxis.</p> <p>In this course, I would like to introduce basic ideas and technics of applied phenomenology.</p>	
Learning Goals / 学習目標	1	<p>(COURSE LEARNING OUTCOMES)</p> <p>1 Knowledge and Understanding. After studying this course you should be able to: Have a basic knowledge about the phenomenology and the psychopathology.</p> <p>2 Skills, Qualities and Attributes. After studying this course you should be able to: Conduct the analysis of empirical data from the standpoint of the phenomenology.</p>
