Course Objectives / 授業の目的と概要	<p>This course will approach the topics of food and eating from a social sciences perspective, encompassing approaches from sociology, cultural anthropology and history. It will cover selected topics through which students learn about the social, cultural and historical embeddedness of food and eating. In addition, students will actively engage with food-related topics through project work and through working on coming up with their own food-related research question.</p> <p>By the end of the course, students are expected to have gained a deeper understanding of a variety of issues surrounding food and eating and how food and eating are shaped by a broad web of social, cultural, economic and political factors. The course will also offer students the opportunity to reflect on their own food choices.</p>
Learning Goals / 学習目標	<p>1</p> <p>Knowledge and Understanding. After studying this course you should be able to:</p> <ul style="list-style-type: none"> Describe food and eating as socio-cultural processes and practices Explain the commodification process of specific food items by identifying key actors, their locale, roles and inter-relationships Describe changes in the meanings of specific food items over time and analyze what socio-economic, cultural, and political factors influence such changes, and Address broader social issues such as globalization and commercialization by analyzing key social relationships <p>Skills, Qualities and Attributes.
